Summary

Recent computer science graduate looking for an opportunity to work in full-stack development. Communicative, collaborative and proactive, with a history of delivering responsive and optimized interfaces for web and mobile. In addition, he is familiar with automated unit testing and knowledge about microservices, cloud and back-end

Experience

CubeCar **March 2023 - September 2023**

Front-end Intern

🌐 <https://cubecar-io.glide.page/dl/home>

The project aims to help people rent their own cars to other people. React/React Native and TailwindCSS were used. I built some screens: PRE-HOME that allowed end users to learn more about the purpose of the application, SUPPORT in case users need help, VEHICLE EDIT in case users need to change something in relation to the vehicle to be rented, FILTER to assist when searching for specific cars, WALLET for the user to send and withdraw the value related to the rentals and MY EARNINGS for the user to view in detail how much their rentals are yielding. All of this added to the platform's application.

Education

Universidade Católica de Pernambuco **February 2020 - December 2023**

Bachelors in Computer Science

9.35

🌐 <https://portal.unicap.br/>

Lecturer of the Unicap Computing Week mini-course 2023.1 (React Native) and 2022.1 (ejs, node.js, express);

Projects

LEXIHIPPO **August 2023 - December 2023**

An application to support intervention speech therapy in the context of dyslexia

🌐 <https://lexihippo.vercel.app/>

Website built with the potential to help speech therapists identify and serve as a means of intervention for children with dyslexia, by creating this application it is possible to reduce the need for paper tests by 90%

Stack: Next.js, Typescript, Javascript and Firebase

Awards

1st Place Thesis - C3 Computer Science - UNICAP 2023.2 **December 2023**
